stairs
BY  **NU-FAB**

Nu-Fab began designing and manufacturing stairs in 1985. Since that time our experienced designers and craftsmen have become established in their design capabilities and manufacturing procedures utilizing the latest computer technology.

Many new homes and renovations include stairs as a focal point so attention to detail is extremely important in the design of your stairs. Nu-Fab can tell you about the endless stair possibilities from circular, winder, straight or exterior to name a few. Our stairs are readily available in many different types of material from standard construction grade stairs to solid hardwood. In most cases our stairs are pre-assembled and ready for installation on site, saving our builders time and money.
